Waste Management, Inc. ILL. E.P.A. - D.L.P.C.  
3003 Butterfield Road STATE OF ILLINOIS City of Chicago  
Oak Brook, Illinois 60521 Chicago, Illinois 60601

Attention: Mr. Dan Nelson

Attention: Mr. John L. Donavon

Gentlemen:

Permit is hereby granted to Waste Management, Inc. and to the City of Chicago to operate a transfer station facility consisting of 15.8 acres in the West 1/2 of the Northwest 1/4, and 30.3 acres in the Northeast 1/4 of Section 13, Township 37 North, Range 14, east of the 3rd Principal Meridian to process and transfer solid waste excluding liquid, special and hazardous waste, all in accordance with the application for a development permit dated June 12, 1980 and received by this Agency on June 16, 1980, and the application for an operating permit dated April 8, 1983 and received by this Agency on April 11, 1983.

This permit is subject to the standard conditions attached and herein incorporated by reference and is further subject to the following special conditions.

1. Any transfer trailer or container containing refuse shall be removed from the site within 24 hours after it is placed outside the transfer station building.
2. Any transfer trailer or container containing refuse that is placed outside the transfer station building shall be removed from the site by 10:30 p.m. each Friday.
3. A preventative extermination program consisting of weekly inspections, and control measures as needed, shall be carried out by a professional exterminator.
4. The facility shall not operate outside the hours of 4:00 a.m. to 10:30 p.m.
5. Containers, equipment and active portions of the facility shall be washed down at least daily. Washwater and leachate shall be handled in accordance with the MSD Sewer Permit Ordinance.

6. Any modifications to the facility, treatment processes, types or classes of waste handled shall be the subject of an application for supplemental permit for site modifications to this Agency.
7. The permittee shall notify the Agency of any changes from the information submitted to the Agency in its application for developmental and operating permits for this site. Permittee shall notify the Agency of any changes in the names or addresses if both beneficial and legal title holders to the herein 'permitted.' Such notification shall be made in writing within fifteen (15) days of such change and shall include the name or names of any parties in interest and the address of their place of abode; or, if a corporation, the name and address of its registered agent.
8. This permit is subject to review and modification by the Agency as deemed necessary to fulfill the intent and purpose of the Environmental Protection Act, and all applicable environmental rules and regulations.

If you have any questions regarding this permit and its conditions, please feel free to contact Robert Stark at 217/785-2892.

Very truly yours,

STANDARD CONDITIONS FOR CONSTRUCTION/DEVELOPMENT PERMITS  
ISSUED BY THE ILLINOIS ENVIRONMENTAL PROTECTION AGENCY

July 1, 1979

The Illinois Environmental Protection Act (Illinois Revised Statutes, Chapter 111-1/2, Section 1039) grants the Environmental Protection Agency authority to impose conditions on permits which it issues. 118 1968

These standard conditions shall apply to all permits which the Agency issues for construction or development projects which require permits under the Divisions of Water Pollution Control, Air Pollution Control, Public Water Supplies, and Land and Noise Pollution Control. Special conditions may also be imposed by the separate divisions in addition to these standard conditions.

1. Unless this permit has been extended or it has been voided by a newly issued permit, this permit will expire one year after date of issuance unless construction or development on this project has started on or prior to that date.
2. The construction or development of facilities covered by this permit shall be done in compliance with applicable provisions of Federal laws and regulations, the Illinois Environmental Protection Act, and Rules and Regulations adopted by the Illinois Pollution Control Board.
3. There shall be no deviations from the approved plans and specifications unless a written request for modification of the project, along with plans and specifications as required, shall have been submitted to the Agency and a supplemental written permit issued.
4. The permittee shall allow any agent duly authorized by the Agency upon the presentation of credentials:
  - a. to enter at reasonable times the permittee's premises where actual or potential effluent, emission or noise sources are located or where any activity is to be conducted pursuant to this permit.
  - b. to have access to and copy at reasonable times any records required to be kept under the terms and conditions of this permit.
  - c. to inspect at reasonable times, including during any hours of operation of equipment constructed or operated under this permit, such equipment or monitoring methodology or equipment required to be kept, used, operated, calibrated and maintained under this permit.

- d. to obtain and remove at reasonable times samples of any discharge or emission of pollutants.
  - e. to enter at reasonable times and utilize any photographic, recording, testing, monitoring or other equipment for the purpose of preserving, testing, monitoring, or recording any activity, discharge, or emission authorized by this permit.
5. The issuance of this permit:
- a. shall not be considered as in any manner affecting the title of the premises upon which the permitted facilities are to be located;
  - b. does not release the permittee from any liability for damage to person or property caused by or resulting from the construction, maintenance, or operation of the proposed facilities;
  - c. does not release the permittee from compliance with other applicable statutes and regulations of the Federal Government, of the State of Illinois, or with applicable local laws, ordinances and regulations;
  - d. does not take into consideration or attest to the structural stability of any units or parts of the project,
  - e. in no manner implies or suggests that the Agency (or its officers, agents or employees) assumes any liability, directly or indirectly, for any loss due to damage, installation, maintenance, or operation of the proposed equipment or facility.
6. Unless a joint construction/operation permit has been issued, a permit for operating shall be obtained from the Agency before the facility or equipment covered by this permit is placed into operation.
7. These standard conditions shall prevail unless modified by special conditions.
8. The Agency may file a complaint with the Board for modification, suspension or revocation of a permit:
- a. upon discovery that the permit application contained misrepresentations, misinformation or false statements or that all relevant facts were not disclosed; or
  - b. upon finding that any standard or special conditions have been violated; or
  - c. upon any violation of the Environmental Protection Act or any Rule or Regulation effective thereunder as a result of the construction or development authorized by this permit.
